Relaxed yet sophisticated décor in this Country Club home. A completely renovated residence by Sheri Kesten, takes an old fashioned floor plan designing a new and fresh look. This 25 plus year old house morphs into a contemporary and updated space. Goodbye columns, arches, and angles; hello new and sleek architecture with contemporary sharp and hip design. Walls torn down create wide open spaces, bring the view to life, and embrace casual and relaxed living.

Have breakfast or lunch at the two tiered island with the raised countertop. The all white kitchen, clean and easy to live with finishing a cheerful and bright living environment. Art and fun fabric on pillows bring in the pop of color, in contrast set against urban cement tiles and the palest of dove grey on the walls.

Play pool, while relaxing with a glass of wine or have a martini at the bar. Opening up the space enhances spontaneous and comfortable design for optimal entertaining.

Wind down and retire to the bedroom with a soft and monochromatic palate.

Read a book on the chaise, cool down and look out at the view, or watch a movie in this comfy upholstered bed. The Cowhide rug on these 48” square tiles finish the perfect elegant yet unpretentious bedroom.
