

This opulent bedroom features a custom upholstered floor to ceiling wall behind a bed to create a dramatic headboard. Upholstered panels in the same leather create a sleek finished look, to house the box spring. The geometric square design element in the headboard is repeated in the geometric pattern of the wall to wall broadloom, and again in the drapery casement panels. The foot of the bed is accented with two signature silver leaf benches, featuring geometric circular openings creating an open contemporary design.

Sheri Kesten is known for her sophisticated sleek environments. Her signature look is often reflected with monochromatic colors, creating a soothing yet inviting atmosphere. She has over 25 years of experience, and has the innate ability to interpret her clients' design objectives and incorporate their lifestyle with her creative and unique ideas. Her impeccable taste and styling is manifested in her design concepts, and readily recognizable in the industry.
