With neutral color palettes, this kitchen has a subtle elegance as well as a cutting edge and sleek dynamic. The combination of the backlit stone and white counter tops makes it classic yet contemporary. A pop of color in the bold artwork and the staggered pendant light fixture create an architecturally pleasing, bright kitchen. Zero clutter on the countertops allows the stunning mix of materials shine, creating kitchen design that blends style and function in a cutting-edge yet inviting space. The counter-height island creates a breakfast bar with comfy swivel leather barstools enhancing the bar off the kitchen. The bar is in an automotive finish of metallic brown, with a built-in wine cooler and topped with the backlit counter top in the same stone as the hood wall.

We needed to design a dining area for practicality while still incorporating formality. The table is an African wood, stained and coated in polyurethane, with a glass top for easy cleaning and maintenance.

Chairs are upholstered in a chenille fabric for comfort and durability. Fixture is Murano crystal and adds the touch of traditional formality that this client enjoys.

The open space of this residence is highlighted with custom, wall-mounted cabinetry. The tailored TV wall panel details a finished look, generating a space that is both casual and formal in its design.

The windows throughout are covered with plantation shutters, and are dressed in designated areas with a dual drapery treatment of opaque and sheer fabrics to control the amount of light let into the space.

This elegant and custom designed fireplace is made of stone tiles imported from Italy, with strategic lighting to create an intimate mood with fireside seating for two. The fire screen is framed in polished stainless steel adorned with Swarovski crystals.

This master bedroom is grand in style, yet warm and cozy. A Swarovski crystal chandelier above a custom designed bed upholstered in brushed velvet conveys a lush and elegant style.

Furniture is custom made, including the night stands and dresser, finished in automotive graphite with custom designed wood stained handles. The drapery treatment is organza over an opaque light blocking fabric. The chair is an Italian import, finished in silver leaf with COM fabric.

Tub surround to update existing bathtub and a custom vanity with his and her sinks.

Salacious art work by the Kevin McPherin Gallery. The vanity is finished in white high gloss template with a grey and white marble, and is adorned with polished nickel hardware imported from Italy. The back wall of the powder room is finished in Italian-imported tile. A Swarovski ceiling mount fixture and wall sconces give this window-less bathroom two modes of lighting on separate switches.
